SUMMARY OF QUALIFICATIONS

Dedicated and passionate web development professional with a postgraduate degree in Web Development. I desire to enhance my abilities in designing, developing, and maintaining dynamic web applications. Proficient at utilizing the latest technologies to create responsive and user-friendly websites with strong programming skills in HTML, CSS, JavaScript, SQL, and experience with frameworks such React, Node.js and Laravel at my fingertips.

WORK EXPERIENCE

Software Engineer - iPOTS - Toronto, ON   2024
- Spearheading the development of an iAccess site to showcase various accommodations for all types of disabilities.
- Designing an intuitive, accessibility-focused user interface to ensure inclusivity for individuals with diverse needs.
- Compiling and managing a comprehensive master list of accommodations, serving as a centralized resource for users.
- Implementing a secure and user-friendly account management system for personalized user experiences.
- Collaborating with cross-functional teams in a remote setting to ensure seamless project execution.
- Conducting usability testing to identify and address accessibility barriers, enhancing the overall user experience.
- Utilizing modern web technologies and frameworks to create a responsive and adaptive platform.
- Documenting project milestones, workflows, and technical specifications to ensure clear communication and future scalability.
- Provided documentation and maintenance for the iAccess site, ensuring its continuous improvement and relevance.

Youth Outreach Coordinator – YMCA – Toronto, ON   2022-2023
- Designed and implemented outreach programs aimed at youth in the community, collaborating with local organizations to help at-risk adolescents, fostering a sense of belonging, environment, and opportunity.

Sales Representative – Walmart – Toronto   2017-2022
- Maintained the cleanliness of the store, restocked supplies and aided customers in their shopping needs.

Youth Program Volunteer – Falstaff Community Centre, Toronto, ON   2015-2022
- Dedicated time and efforts to supporting and mentoring young individuals, providing valuable guidance, and creating rich experiences.

PROJECTS

Boulon Store
- Led the development of Boulon, a fashion store web app, demonstrating proficiency in full-stack technologies such as Node.js, Express, MongoDB Atlas, and Pug.
- Implemented a responsive design with Bootstrap, optimizing user experience across devices, amplifying accessibility and engagement alongside beautiful design.
- Integrated MongoDB Atlas, a NoSQL database, enhancing data storage and retrieval efficiency, showcasing adaptability and scalability for future growth.
- Structured and designed three sections (Home, Men's, Women's), streamlining navigation, and enhancing user interaction, showcasing adeptness in full-stack development.

FootLMS
- Engineered FootLMS, a Laravel-based project, enabling comprehensive CRUD functionalities for managing football player data and their corresponding statistics and

teams, showcasing adept PHP skills and profound understanding of Laravel's MVC architecture.
- Implemented stringent security protocols within FootLMS, allowing access exclusively to authenticated users, demonstrating mastery in Laravel's authentication and authorization mechanisms, ensuring data privacy and integrity.
- Leveraged Laravel's advanced features to optimize data management and user interaction in FootLMS, employing ORM principles and MVC design patterns, thereby enhancing scalability and maintainability of the application.

Bill Evader
- Spearheaded the Bill Evader project, conceptualizing the core game mechanics and overseeing its development as the team leader.
- Collaborated with team members to utilize the Canvas API, JavaScript, HTML, and CSS in creating an immersive gaming experience focused on navigating college expenses.
- Demonstrated leadership by guiding the team through the project lifecycle, coordinating tasks, and ensuring effective communication to achieve project goals.

EDUCATION

Postgraduate Degree in Web Development   Humber College | 2024
- Mastered front-end development technologies, including HTML, CSS, and JavaScript to create responsive and visually stunning user interfaces.
- Obtained in-depth knowledge of back-end development using languages like Node.js, PHP and SQL enabling the creation of robust, secure databases and scalable websites.
- Developed expertise in web frameworks such as React and Laravel, streamlining the development process and functionality of websites.
- Explored topics in web security like coding standards (BEM) which allows for quick development and simple long-term maintenance.
- Gained proficiency in version control systems like Git, ensuring collaborative and coherent code development with teams.
- Studied the foundations of user experience design (UXD), with usability and accessibility at the forefront of development.
- Learned the latest trends and technologies in web development, staying up to date on the industry's best practices and innovations.
- Cultivated strong communication and collaboration skills through team projects, presentations, and discussions during the program.

Bachelor's Degree in Human Rights and Equity Studies   York University | 2022
- Acquired a strong grasp of constitutional and international laws, including mechanisms for enforcing and protecting human rights at both national and international laws.
- Honed critical thinking and analytical skills through the examination of contemporary human rights issues and case studies.
- Demonstrated proficiency in conducting research using qualitative and quantitative methodologies to analyze social phenomena.
- Evaluated public policies through policy analysis coursework, examining their impact of different communities and their social inequalities.
