

Ederes Gure

Software Developer

SUMMARY OF QUALIFICATIONS

Software Developer with hands-on experience designing, developing, testing, and maintaining responsive, accessible, data-driven web applications using React, TypeScript, Node.js, and SQL/NoSQL databases. Proven ability to translate technical specifications and business requirements into production-ready solutions, troubleshoot complex issues, and deliver WCAG 2.x AA and AODA-compliant interfaces within Agile, collaborative environments.

SKILLS

HTML, CSS, JavaScript, TypeScript, jQuery, Python, React.js, Remix.js, Zod, Next.js, Express.js, MongoDB, NoSQL Databases, MySQL, PostgreSQL, ASP.NET, MVC, C#, Material UI Design, Figma, Bootstrap, Tailwind.CSS, CI/CD, Unit Testing, HTTP, VS Code, Jasmine, Cypress, PHP, Laravel, Docker, Cloud Deployment, Git, Wireframing, Excel, REST APIs, Debugging, Collaboration, Problem Solving, WCAG 2.x AA, AODA, ARIA, Agile / Scrum Development, User Stories

WORK EXPERIENCE

Web Developer - University of Toronto - Toronto, ON 04/2025 - 09/2025

- Automated data validation and cleanup, improving record accuracy by 40%
- Designed responsive HTML email templates tested across major browsers and devices.
- Tracked and reported data quality trends using Excel formulas and macros.
- Reduced errors and administrative burdens through efficient data management practices.

Software Developer - Lodestone - Toronto, ON 09/2024 - 03/2025

- Developed and maintained a scalable product management application using TypeScript, React, Remix.js, and PostgreSQL.
- Integrated REST APIs to streamline real-time data flow across frontend components.
- Improved app performance via refactoring and state-management optimization.
- Implemented database schemas, Prisma ORM, and secure migration processes.
- Built features such as document exports, enhancing user productivity and client satisfaction.
- Used GitHub workflows for version control, code review, and collaboration.
- Contributed to deployments in both local and cloud environments.
- Wrote and executed unit and integration tests using Jasmine and Cypress, following TDD principles.

Software Engineer - iPOTS - Toronto, ON 07/2024 - 09/2024

- Led frontend and backend development for an accessibility-focused web platform using React and TypeScript, PHP and MySQL.
- Ensured WCAG 2.x AA and AODA compliance through semantic HTML and ARIA enhancements.
- Fixed usability barriers through accessibility training and iterative improvements
- Delivered and maintained a production web experience supporting users with disabilities.
- Created Figma wireframes and UI designs that served as the basis for front-end development.

PROJECTS

Boulon Store | Full Stack Web App

- Led the development of Boulon, a fashion store web app, demonstrating proficiency in full-stack technologies such as Node.js, Express, MongoDB Atlas, and Pug.
- Implemented a responsive design with Bootstrap, optimizing user experience across devices, amplifying accessibility and engagement alongside beautiful design.
- Integrated MongoDB Atlas, a NoSQL database, enhancing data storage and retrieval efficiency, showcasing adaptability and scalability for future growth.

FootLMS

- Engineered FootLMS, a Laravel-based project, enabling comprehensive CRUD functionalities for managing football player data and their corresponding statistics and teams, showcasing adept PHP skills and profound understanding of Laravel's MVC architecture.

- Leveraged Laravel's advanced features to optimize data management and user interaction in FootLMS, employing ORM principles and MVC design patterns, thereby enhancing scalability and maintainability of the application.

Bill Evader

- Spearheaded the Bill Evader project, conceptualizing the core game mechanics and overseeing its development as the team leader.
- Collaborated with team members to utilize the Canvas API, JavaScript, HTML, and CSS in creating an immersive gaming experience focused on navigating college expenses.
- Demonstrated leadership by guiding the team through the project lifecycle, coordinating tasks, and ensuring effective communication to achieve project goals.

EDUCATION

Postgraduate Degree in Web Development	Humber College 2024
--	-----------------------

- Mastered front-end development technologies, including HTML, CSS, and JavaScript to create responsive and visually stunning user interfaces.
- Obtained in-depth knowledge of back-end development using languages like Node.js, PHP, SQL, ASP.NET, and C# enabling the creation of robust, secure databases and scalable websites.
- Developed expertise in web frameworks such as React and Laravel, streamlining the development process and functionality of websites.
- Explored topics in web security like coding standards (BEM) which allows for quick development and simple long-term maintenance.
- Gained proficiency in version control systems like Git, ensuring collaborative and coherent code development with teams.
- Studied the foundations of user experience design (UXD), with usability and accessibility at the forefront of development.
- Cultivated strong communication and collaboration skills through team projects, presentations, and discussions during the program.

Bachelor's Degree in Human Rights and Equity Studies	York University 2022
--	------------------------

- Acquired a strong grasp of constitutional and international laws, including mechanisms for enforcing and protecting human rights at both national and international laws.
- Demonstrated proficiency in conducting research using qualitative and quantitative methodologies to analyze social phenomena.
