

Ederes Gure

Software Developer

SUMMARY OF QUALIFICATIONS

Highly skilled software development professional bringing talents for software design, development, and integration. Offering advanced knowledge of in-demand programming languages. Background writing code and developing systems for software applications.

WORK EXPERIENCE

Web Developer - University of Toronto - Toronto, ON 04/2025 - 09/2025

- Entered and updated alumni data into CRM systems with 98% accuracy through data matching and cleansing processes.
- Processed 500+ event registrations, managing records, cross-checking submissions, and correcting inconsistencies.
- Developed and formatted email templates in HTML; ensured cross-platform compatibility through extensive testing.
- Coordinated with multiple internal departments to review and approve outgoing communications using a help desk system.
- Maintained records of email sends, approvals, and revisions; tracked tasks through an internal ticketing system.
- Generated weekly reports and status updates for project leads to support timely communications.
- Used Excel (including formulas and macros) to track, validate, and report on data, reducing entry errors by 40%.

Software Developer - Lodestone - Toronto, ON 09/2024 - 03/2025

- Developing and maintaining an enterprise-level product management application using TypeScript, Remix.js, and PostgreSQL ensuring scalability, accessibility, and performance optimization
- Integrating REST APIs (JSON, XML) with front-end components, ensuring secure and efficient data flow
- Optimizing application performance through code refactoring, state management (React), and best practices in responsive UI development
- Saved time and resources by identifying and fixing bugs before product deployment.
- Built user-friendly features to enhance overall system performance and usability
- Designed, developed and implemented export features that allow users to generate and download presentations directly from the platform
- Utilized Git and GitHub for branching strategies, pull requests, and version control in a collaborative development environment
- Ensured secure database management using Prisma ORM and Docker, implementing access control best practices, built databases and table structures, creating schemas and migrations.
- Used browser dev tools and logging to identify and resolve UI/UX issues
- Assisted in configuring and deploying software on local and cloud environments
- Designed and developed forward-thinking features that meet user needs and improve productivity.

Software Engineer - iPOTS - Toronto, ON 07/2024 - 09/2024

- Led the front-end development of an accessibility-focused web platform using React, TypeScript, and PHP, ensuring full compliance with WCAG 2.x AA and AODA standards
- Designed and implemented ARIA attributes to enhance screen-reader compatibility and user experience for people with disabilities
- Conducted usability testing to identify and eliminate accessibility barriers, improving navigation, readability, and assistive technology compatibility
- Developed UI components with semantic HTML and CSS3 to ensure responsiveness and adherence to accessibility best practices
- Compiling and managing a comprehensive master list of accommodations, serving as a centralized resource for users
- Collaborating with cross-functional teams in a remote setting to ensure seamless project execution

- Provided documentation and maintenance for the iAccess site, ensuring its continuous improvement and relevance
- Delivered a fully accessible website to assist users with disabilities, addressing common accessibility challenges and ensuring inclusivity

PROJECTS

Boulon Store

- Led the development of Boulon, a fashion store web app, demonstrating proficiency in full-stack technologies such as Node.js, Express, MongoDB Atlas, and Pug.
- Implemented a responsive design with Bootstrap, optimizing user experience across devices, amplifying accessibility and engagement alongside beautiful design.
- Integrated MongoDB Atlas, a NoSQL database, enhancing data storage and retrieval efficiency, showcasing adaptability and scalability for future growth.

FootLMS

- Engineered FootLMS, a Laravel-based project, enabling comprehensive CRUD functionalities for managing football player data and their corresponding statistics and teams, showcasing adept PHP skills and profound understanding of Laravel's MVC architecture.
- Leveraged Laravel's advanced features to optimize data management and user interaction in FootLMS, employing ORM principles and MVC design patterns, thereby enhancing scalability and maintainability of the application.

Bill Evader

- Spearheaded the Bill Evader project, conceptualizing the core game mechanics and overseeing its development as the team leader.
- Collaborated with team members to utilize the Canvas API, JavaScript, HTML, and CSS in creating an immersive gaming experience focused on navigating college expenses.
- Demonstrated leadership by guiding the team through the project lifecycle, coordinating tasks, and ensuring effective communication to achieve project goals.

EDUCATION

Postgraduate Degree in Web Development

Humber College | 2024

- Mastered front-end development technologies, including HTML, CSS, and JavaScript to create responsive and visually stunning user interfaces.
- Obtained in-depth knowledge of back-end development using languages like Node.js, PHP, SQL, ASP.NET, and C# enabling the creation of robust, secure databases and scalable websites.
- Developed expertise in web frameworks such as React and Laravel, streamlining the development process and functionality of websites.
- Explored topics in web security like coding standards (BEM) which allows for quick development and simple long-term maintenance.
- Gained proficiency in version control systems like Git, ensuring collaborative and coherent code development with teams.
- Studied the foundations of user experience design (UXD), with usability and accessibility at the forefront of development.
- Learned the latest trends and technologies in web development, staying up to date on the industry's best practices and innovations.
- Cultivated strong communication and collaboration skills through team projects, presentations, and discussions during the program.

Bachelor's Degree in Human Rights and Equity Studies

York University | 2022

- Acquired a strong grasp of constitutional and international laws, including mechanisms for enforcing and protecting human rights at both national and international laws.
- Demonstrated proficiency in conducting research using qualitative and quantitative methodologies to analyze social phenomena.
