

Ederes Gure

Web Developer

SUMMARY OF QUALIFICATIONS

Web Developer with experience planning, designing, and delivering accessible, data-driven web applications. Skilled in translating stakeholder requirements into scalable technical solutions, with hands-on expertise in front-end and back-end development using JavaScript, TypeScript, and PHP-based frameworks. Strong background in WCAG 2.x AA and AODA compliance, performance optimization, and content-driven architectures. Experienced in collaborative Agile environments, with a growing focus on CMS development, user experience strategy, and platform modernization.

SKILLS

HTML, CSS, JavaScript, TypeScript, React, jQuery, Responsive Design, PHP, Laravel, Node.js, Express.js, MySQL, PostgreSQL, MongoDB, Git, Docker, CI/CD, REST APIs, Cypress, Jasmine, Agile/Scrum, WCAG 2.x AA, AODA, ARIA, Figma, Wireframing, Debugging, Performance Optimization, API Integration

WORK EXPERIENCE

Web Developer - University of Toronto - Toronto, ON 04/2025 - 02/2026

- Developed and maintained responsive, reusable HTML email templates for large-scale institutional campaigns.
- Ensured cross-browser and cross-client compatibility (Outlook, Gmail, mobile), troubleshooting rendering issues and inconsistencies.
- Collaborated with internal stakeholders to gather requirements and iterate on template design and content.
- Managed multiple concurrent template updates through a ticketing system, ensuring timely and accurate delivery.
- Improved template reliability and reduced errors through structured testing and validation processes.
- Worked with stakeholders to refine requirements and ensure successful delivery.

Software Developer - Lodestone - Toronto, ON 09/2024 - 03/2025

- Designed and developed a scalable product management application using TypeScript, React, Remix.js, and PostgreSQL.
- Translated business requirements into technical features, contributing to application structure, navigation, and user experience improvements.
- Integrated REST APIs to support dynamic, real-time data flow across the application.
- Improved performance through refactoring and optimized state management.
- Designed and maintained database schemas using Prisma ORM, ensuring efficient and secure data handling.
- Contributed to deployment workflows in local and cloud environments, supporting scalable delivery.
- Wrote and executed unit and integration tests using Cypress and Jasmine to ensure reliability and quality assurance.

Software Engineer - iPOTS - Toronto, ON 02/2024 - 09/2024

- Led development of an accessibility-focused web platform using React, TypeScript, PHP, and MySQL.
- Ensured WCAG 2.x AA and AODA compliance through semantic HTML, ARIA implementation, and usability improvements.
- Collaborated with stakeholders to identify accessibility barriers and implement iterative enhancements.
- Designed and developed both frontend interfaces and backend functionality for a production web application.
- Created wireframes and UI concepts in Figma to guide development and improve user experience.

PROJECTS

Boulon Store | Full Stack Web App

- Developed a content-driven e-commerce web application using Node.js, Express, MongoDB, and Pug templating.
- Structured application architecture to support scalable data management and dynamic content rendering.
- Implemented responsive UI and accessibility-focused design using Bootstrap.

FootLMS

- Built a Laravel-based platform with full CRUD functionality for managing structured data and user interactions.
- Applied MVC architecture and ORM principles to create maintainable and scalable backend systems.
- Designed database relationships and workflows supporting efficient content and data management.

Bill Evader

- Led development of a JavaScript-based browser game using the Canvas API.
- Coordinated team tasks, project timelines, and communication to deliver a complete interactive product.

EDUCATION

Postgraduate Degree in Web Development
Bachelor’s Degree in Human Rights and Equity Studies

Humber College | 2024
York University | 2022
